

## FISHER'S COMPLIANCE SERVICES

# CYBER LIABILITY

### A GROWING NEED TO INSURANCE COMPLIANCE

Many cyber liability claims are being denied because policyholders can't prove they've met the terms of their policies by making ongoing efforts to minimize threats. To assure payouts, companies need compliance management and reporting that meets cyber insurance policy terms.

Depending on the policy limits, cyber liability claims can be quite high. Without a payout from their claim, companies often struggle to recover from breaches. Delivering ongoing cybersecurity management and reporting that's designed to meet insurers' requirements benefits your organization and can help protect your investments. Most companies, even with good plans in place, will probably have a security incident at some point. Cyber liability insurance provides peace of mind to the owners and operators of the company.
