

FISHER'S COMPLIANCY SERVICES

PCI

THE RISK & COST OF "DOING IT YOURSELF"

Many organizations don't fully understand the requirements and their responsibilities when it comes to maintaining PCI Security Compliance. Many organizations treat compliance as a one-time, annual event. But only focusing on an annual compliance assessment can create a false sense of security.

Forensic investigators have discovered that security controls deployed by organizations that had passed an assessment were often out of compliance when breaches occurred at a later date. It's only by achieving and maintaining compliance that your cyber defenses will be adequately primed against attacks aimed at stealing cardholder data.

TARGETED AUDIENCE:

Business that accept and process, store, or transmit online financial transactions/credit card data

MONTHLY RATE:

Determined by number of users and locations
Plans start at \$250/month

PRIMARY REPORTS INCLUDE:

- PCI Risk Analysis
