eDISCOVERY

PRIVACY REGULATIONS: WHAT DOES IT MEAN?

Privacy laws bring substantial compliance challenges for every organization that collects, processes, stores, and transfers personal data anywhere in the world. For legal departments, compliance professionals and internal investigators these privacy laws create a whole set of new obligations.

With eDiscovery platforms, organizations are empowered to remain compliant with the increasingly stricter privacy regulations. Smart eDiscovery functionalities lead to better, faster, more efficient and less disruptive handling of General Data Protection Regulation or California Consumer Privacy Act access requests.

TARGETED AUDIENCE:

Organizations that manage digital information from citizens and consumers

MONTHLY RATE:

Determined by number of users and locations
Plans start at \$250/month

PRIMARY REPORTS INCLUDE:

- Secure data collection and storage
- Advanced visual query builder
- Document review and tagging
- Production Reporting
- Technology Assisted Review
